

## CREATE IBM WATSON IOT PLATFORM AND DEVICE

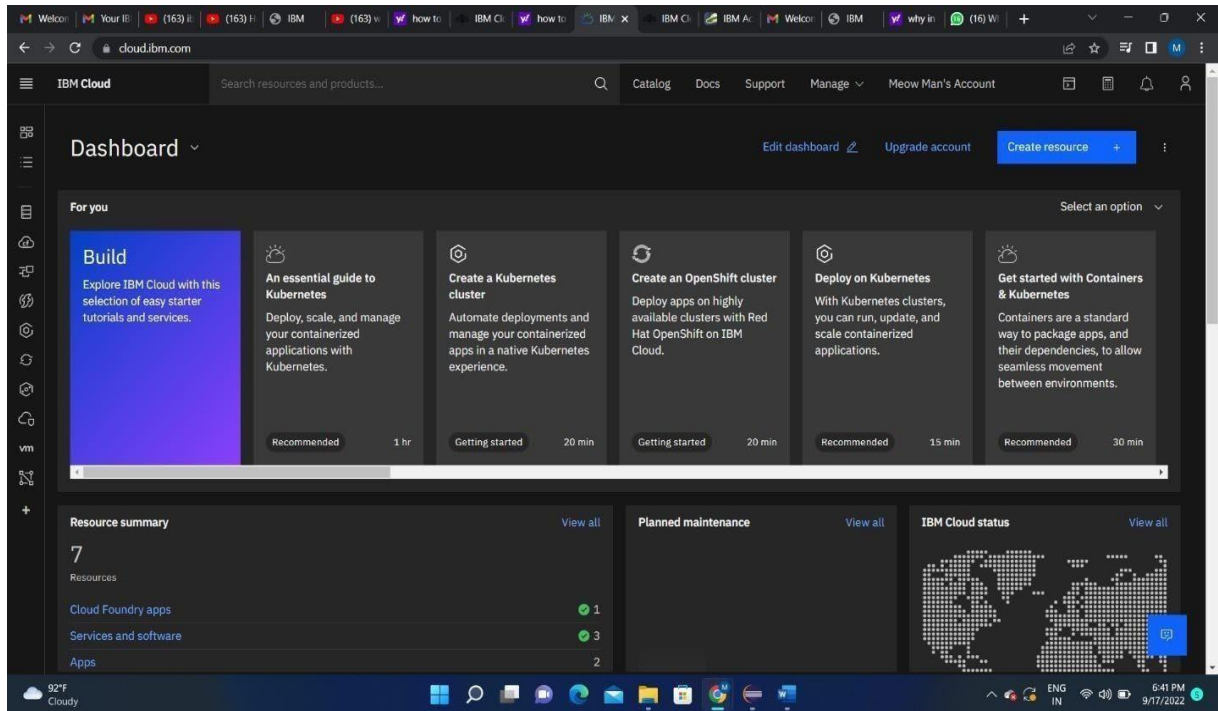

Date	22-10-2022
Team ID	PNT2022TMID11105
Project Name	IOT based safety gadgetfor child safety monitoring and notification
Maximum Marks	4 Marks
Submitted By	Susmitha SR Swaranamaliga PJ Sowmiya NM Vasundara S

### STEPS:

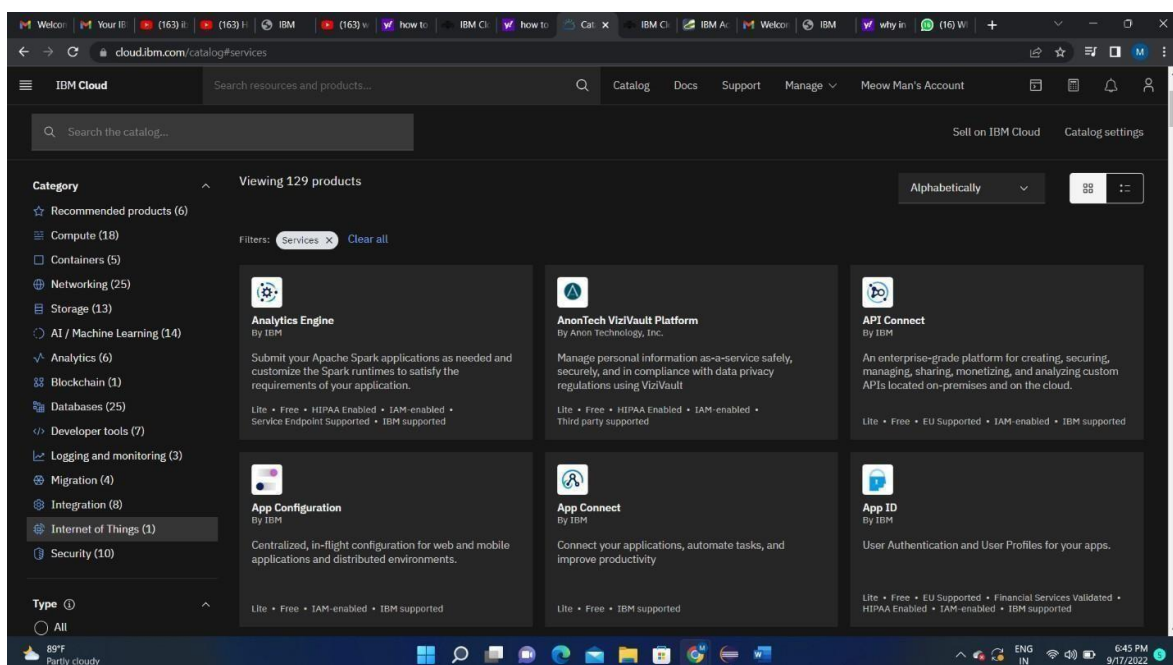

1. Firstly create an IBM cloud account with IBMid and password

## 2. Home page of IBM cloud

## 3. Click on the catalog on the top

## Click on IoT in the category mentioned

The screenshot shows the IBM Cloud IoT Platform page. The 'Create' tab is active, displaying a 'Select a location' dropdown menu with options: Dallas (us-south), Frankfurt, London, Dallas, and Washington DC. Below this is a 'Select a pricing plan' section with a table of plans. The 'Lite' plan is selected, showing features like up to 500 registered devices and 200 MB of data storage. A warning message on the right states: 'Existing Lite plan instance. You can have only 1 Lite plan instance of this service per resource group. Delete your current Lite plan instance in Default resource group to create a new one, or view the existing instance.' The 'Create' button is disabled.

Plan	Features	Pricing
Lite	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric Maximum of 500 registered devices Maximum of 500 application bindings Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed	Free

## 4. If already a lite is present delete it else u can't create another

The screenshot shows the IBM Cloud IoT Platform page with the 'Configure your resource' tab active. The 'Service name' field is set to 'Internet of Things Platform-bb'. The 'Select a resource group' dropdown is set to 'Default'. The 'Access management tags' field is empty. The 'Create' button is disabled. A warning message on the right states: 'Existing Lite plan instance. You can have only 1 Lite plan instance of this service per resource group. Delete your current Lite plan instance in Default resource group to create a new one, or view the existing instance.' The 'Create' button is disabled.

Plan	Features	Pricing
Lite	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric Maximum of 500 registered devices Maximum of 500 application bindings Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed	Free

5. Enter the location and in the configure your resource type the service name and choose the plan, tick the agree with agreements and then click on create

6. Internet of Things Platform Child\_safety will be created, where there are different options like manage, plan, and connection ( manage is for launch, Plan gives us the idea about the payment package and its upgrades, and lastly the connection is for to connect IoT with other services)

The screenshot shows the IBM Cloud IoT Platform console. The left sidebar has a 'Manage' tab selected. The main content area displays a 'Let's get started with IBM Watson IoT Platform' section with a 'Launch' button. Below this is the 'IBM Watson IoT Platform Journey' section, which shows three stages: 'Lite' (selected), 'Non-Production', and 'Production'. The 'Lite' stage is described as a lightweight development environment. The 'Non-Production' stage is a full-featured, fully-integrated offering. The 'Production' stage is a fully managed SaaS offering. The bottom of the screen shows a Windows taskbar with the date 9/17/2022 and time 7:28 PM.

The screenshot shows the IBM Cloud IoT Platform console with the 'Plan' tab selected. The main content area displays the 'Current plan' section, which shows the 'Lite' plan. The 'Features' section lists the following details:

- Includes up to 500 registered devices, and a maximum of 200 MB of each data metric
- Maximum of 500 registered devices
- Maximum of 500 application bindings
- Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed

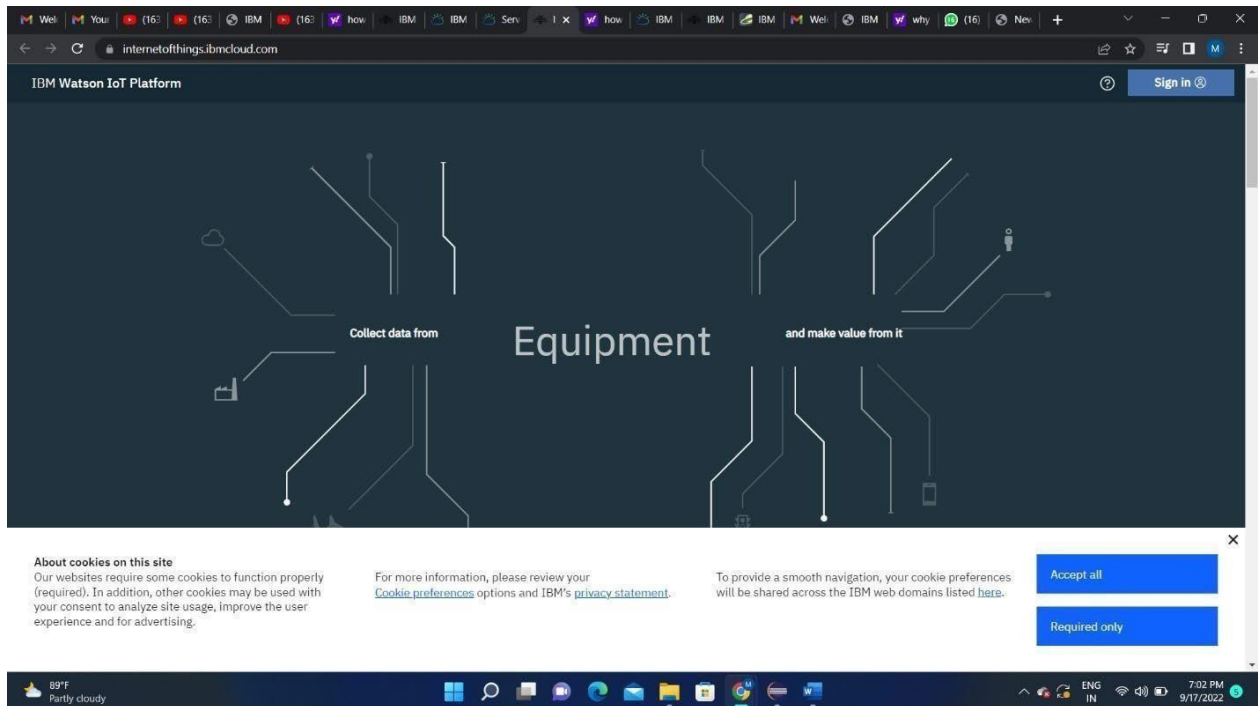

The 'Current usage' section shows 'N/A' and a note: 'Lite plan services are deleted after 30 days of inactivity.' Below this is the 'Change pricing plan' section, which shows a table with the following columns: Plan, Features, and Pricing.

Plan	Features	Pricing
Lite	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric Maximum of 500 registered devices Maximum of 500 application bindings Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed	Free

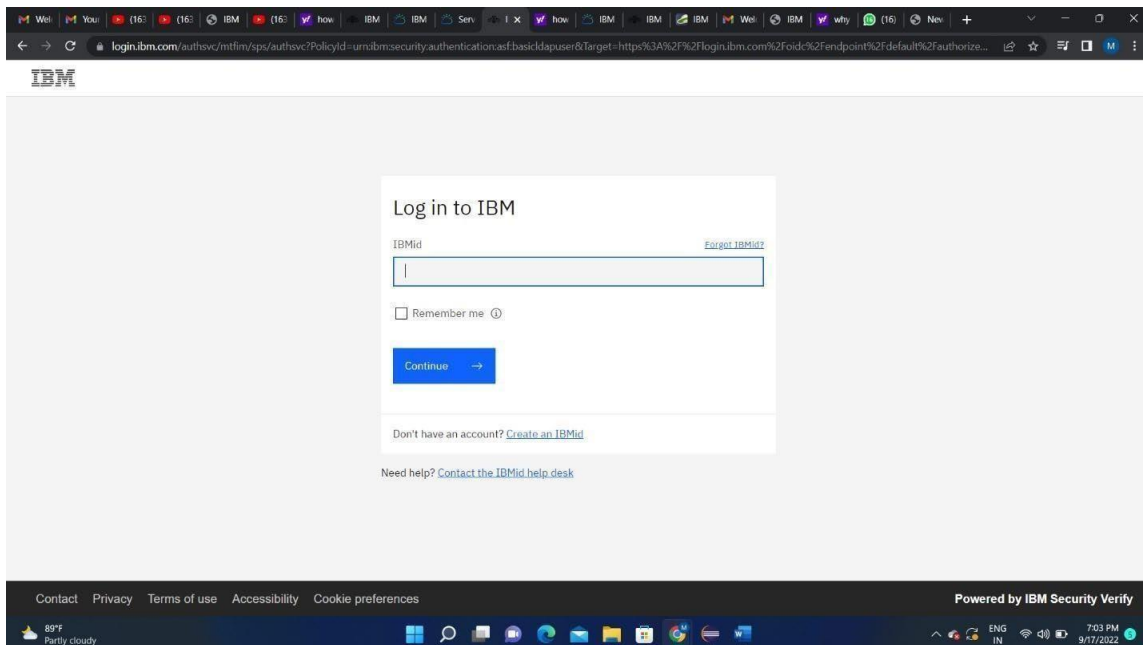

The bottom of the screen shows a Windows taskbar with the date 9/17/2022 and time 7:28 PM.

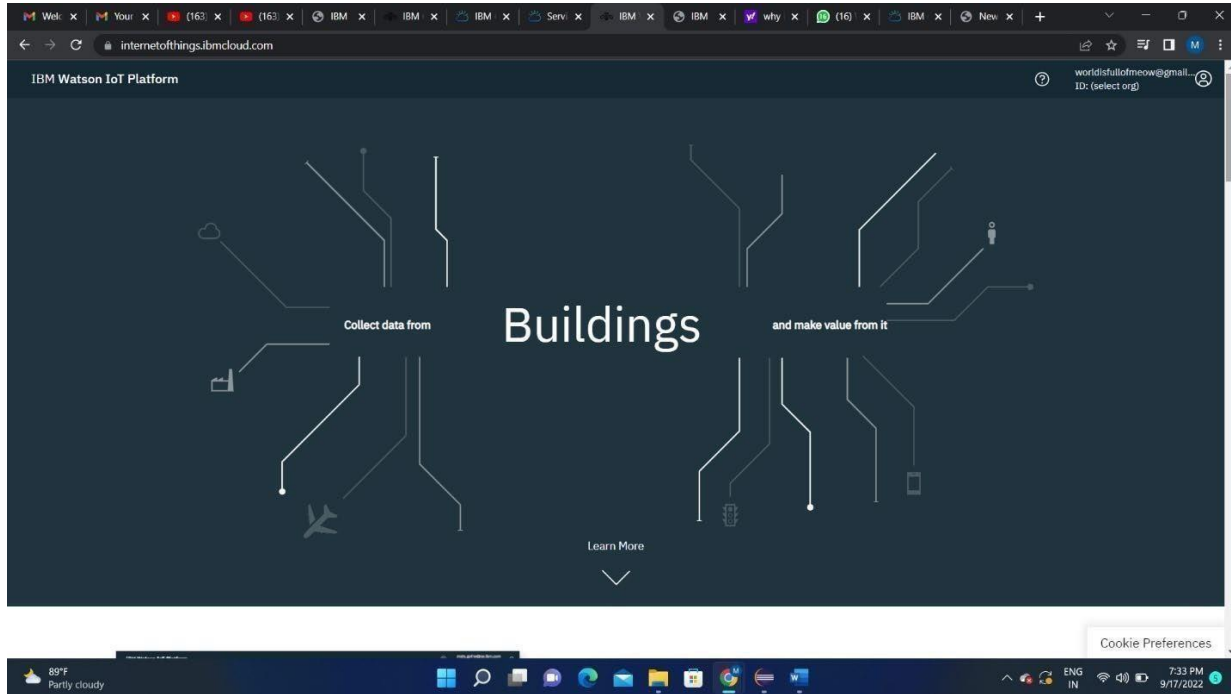

7. Clicking on the launch button in the manage tab, it will open to this

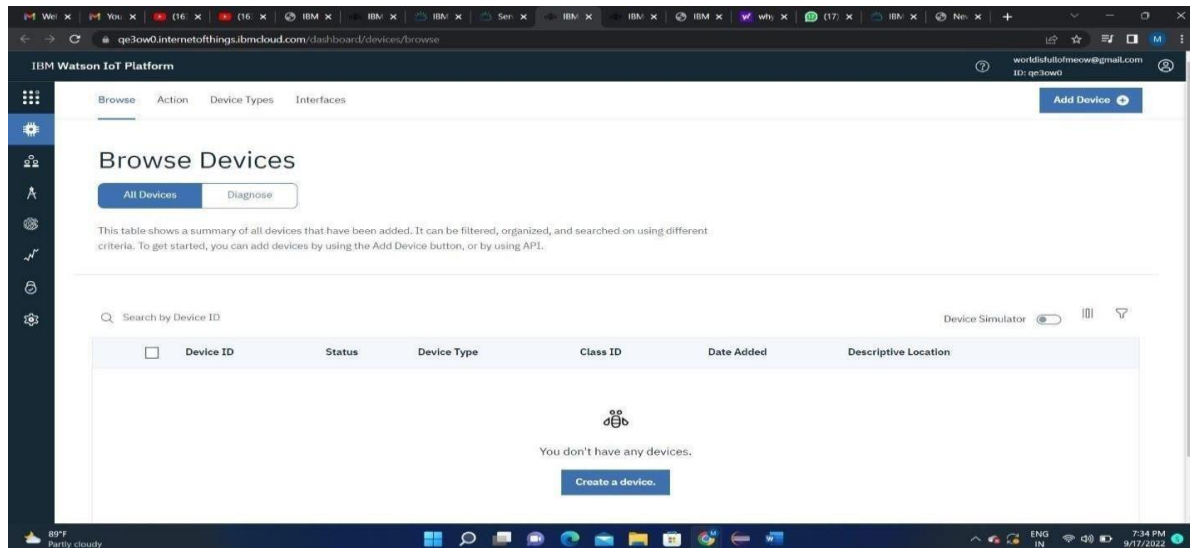

8. Enter the details to sign in to the Watson Cloud to create a device

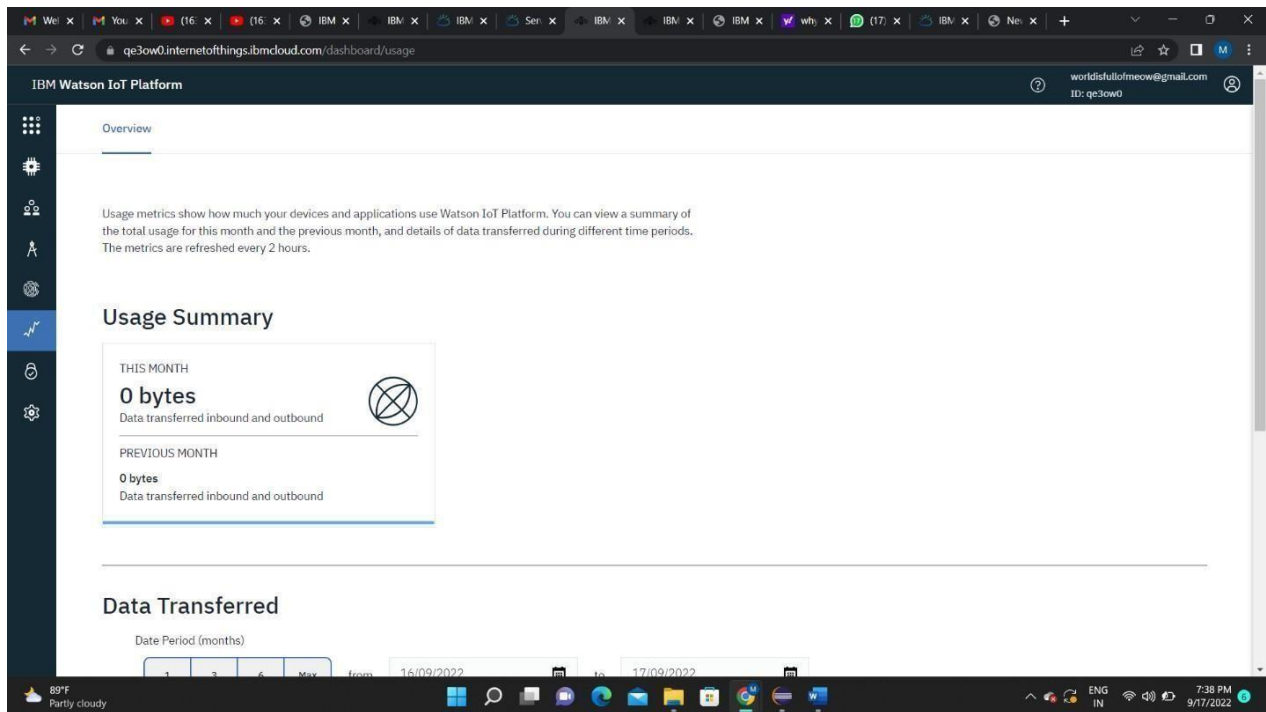

9. Once logged in the name will be displayed and it goes back to the first page

10. And again clicking on the launch button will open this tab, the device will help in the creation of the devices, the addition of devices, and the display of details of the devices

11. Usage gives the summary of how many bytes are used between the devices and the IBM cloud.

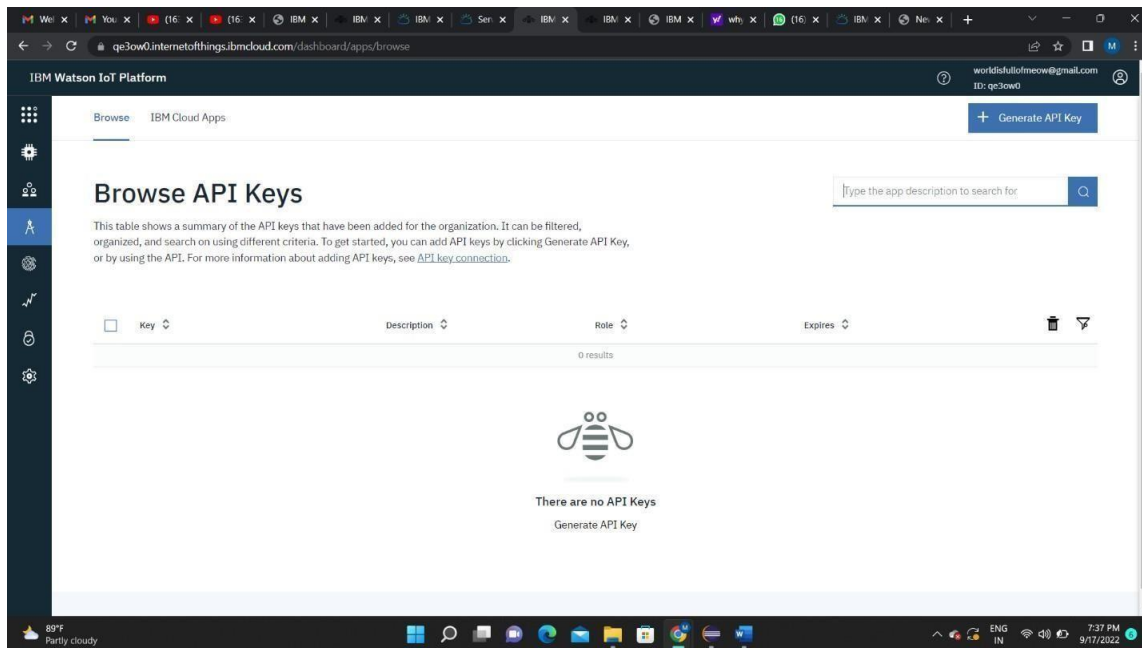

12. The member tab is add the teams members to work in the platform

The screenshot shows the IBM Watson IoT Platform dashboard. The top navigation bar includes the IBM logo and the user's email address, worldisfulofmeow@gmail.com, with the ID: qe3ow0. The main content area is titled "Browse Members" and features a search bar with the placeholder text "Type the member email to search for". Below the search bar, there is a table with columns: Email Address, Name, Role, Added By, Expires, and a trash icon. The table contains one row of data for the user worldisfulofmeow@gmail.com, who is an Administrator. The bottom of the screen shows a Windows taskbar with various application icons and a system tray indicating 89°F and 7:38 PM on 9/17/2022.

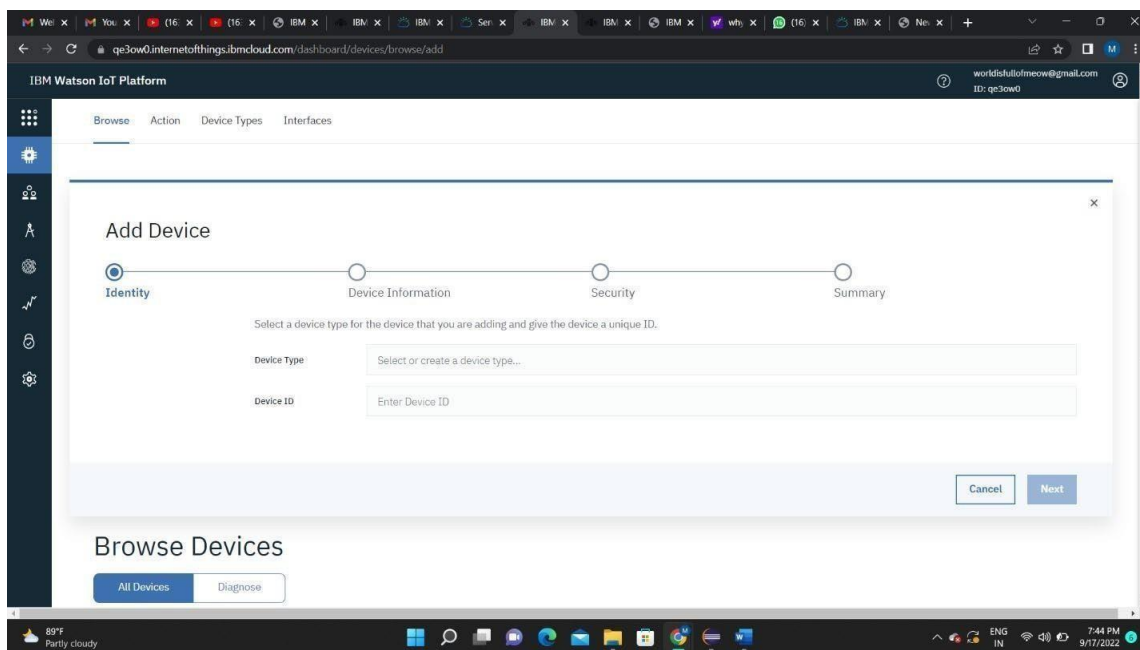

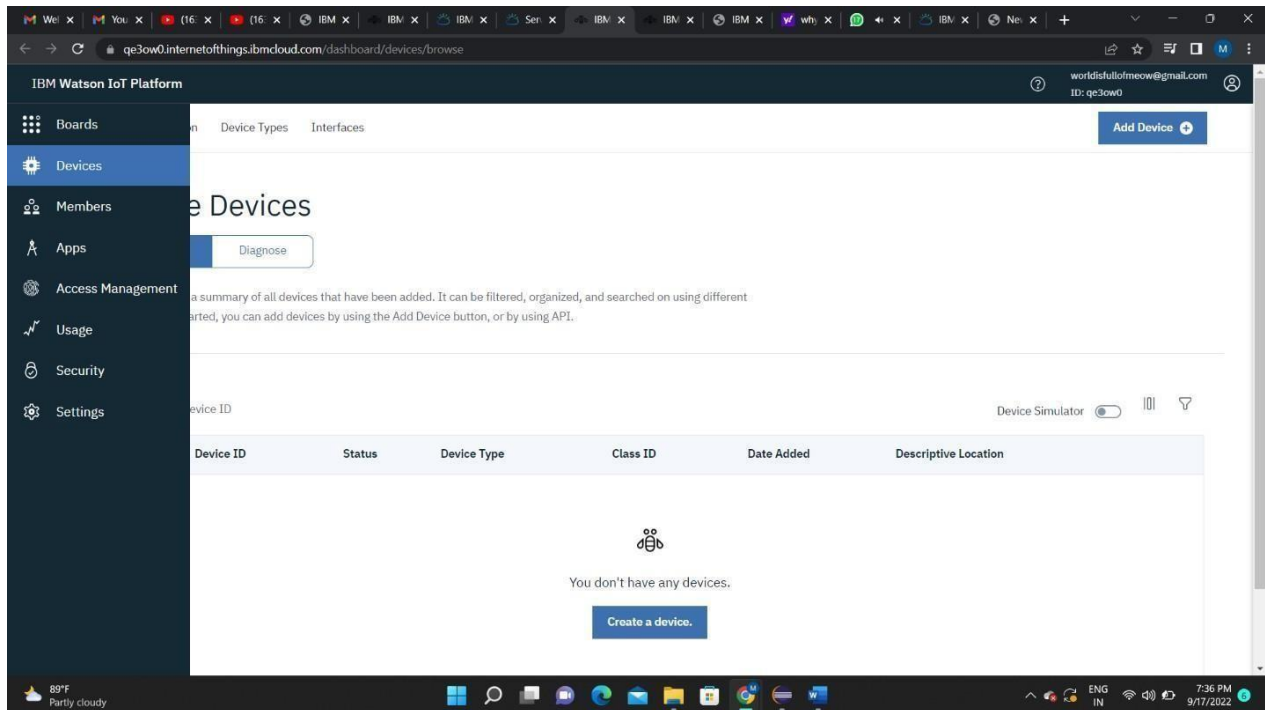

Email Address	Name	Role	Added By	Expires
worldisfulofmeow@gmail.com	worldisfulofmeow@gmail.com	Administrator	-	-

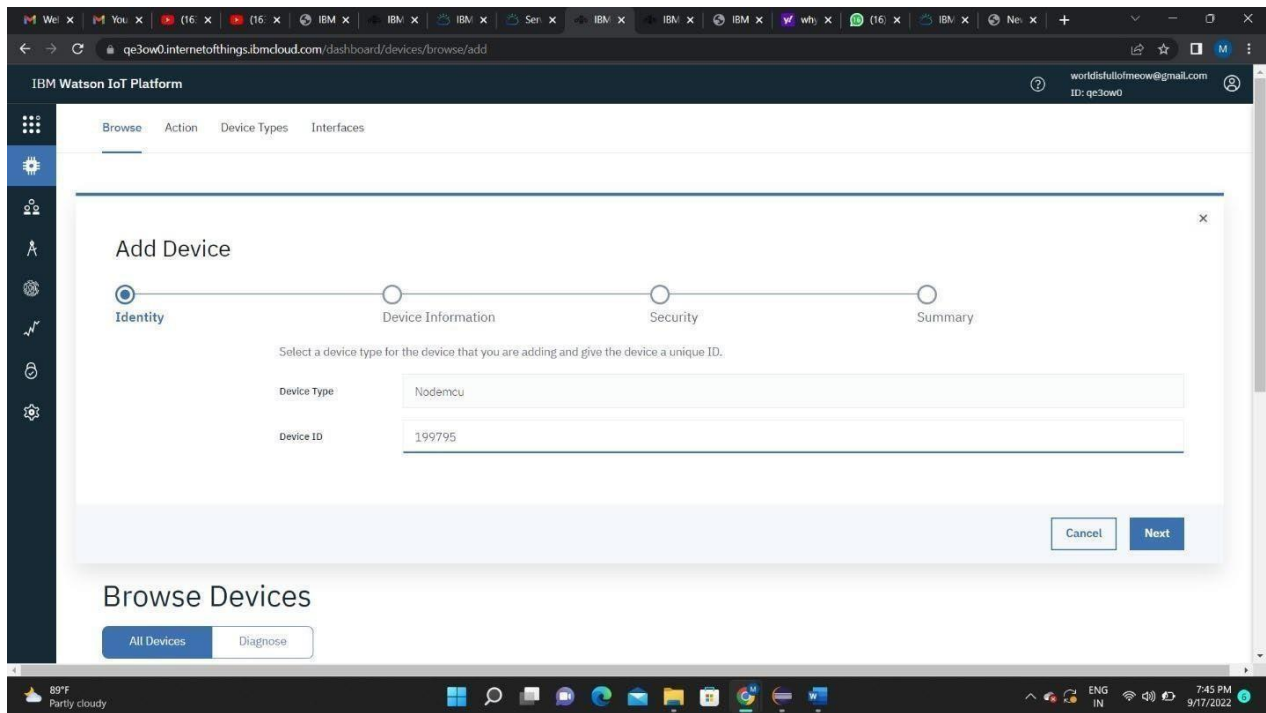

13. This tab is used when you want to connect to some other platform and to integrate with other services.

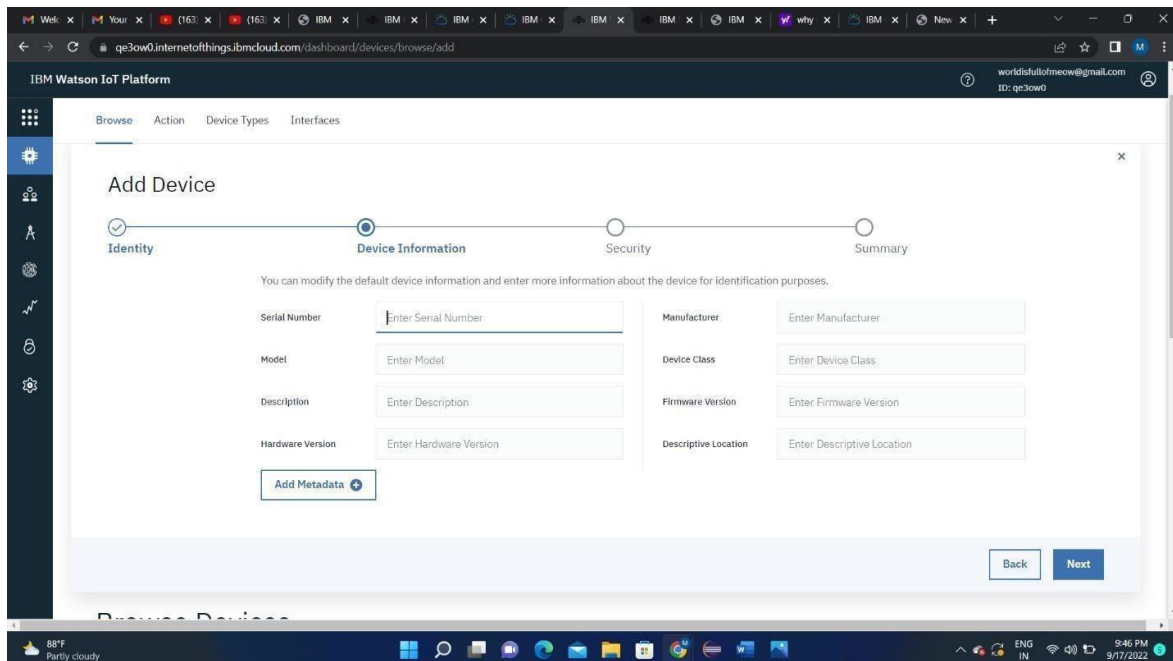

14. Click on the device tab and click on the add device button, then give the device type and device id and click next

15. This page to enter extra details and of the hardware

16. Clicking next it goes to the security where we do authentication token id.

The screenshot shows the 'Add Device' wizard in the IBM Watson IoT Platform. The 'Security' step is active, showing two options for authentication: 'Auto-generated authentication token (default)' and 'Self-provided authentication token'. The 'Auto-generated' option is selected, and a token '1997199520012005' is displayed in a text box. Below the token, a note states: 'Make a note of the generated token. Lost authentication tokens cannot be recovered. Tokens are encrypted before being stored. Authentication token are encrypted before we store them.'

Browse Action Device Types Interfaces

Add Device

Identity Device Information Security Summary

There are two options for selecting a device authentication token.

**Auto-generated authentication token (default)**

Allow the service to generate an authentication token for you. Tokens are 18 characters and contain a mix of alphanumeric characters and symbols. The token is returned to you at the end of the device registration process.

Authentication Token: 1997199520012005

Make a note of the generated token. Lost authentication tokens cannot be recovered. Tokens are encrypted before being stored.

Authentication token are encrypted before we store them.

Self-provided authentication token

Provide your own authentication token for this device. The token must be between 8 and 36 characters and contain a mix of lowercase and uppercase letters, numbers, and symbols, which can include hyphens, underscores, and periods. Do not use repeated characters, dictionary words, user names, or other predefined sequences.

89°F Partly cloudy 8:06 PM 9/17/2022

17. Clicking on next it goes to the summary of the device then click finish

The screenshot shows the 'Add Device' wizard in the IBM Watson IoT Platform, now at the 'Summary' step. The 'Summary' step is active, displaying the device information: 'Device Type: Nodemcu', 'Device ID: 199795', and 'Security Token: 1997199520012005'. A 'View Metadata' button is visible below the device ID. At the bottom right, there are 'Back' and 'Finish' buttons.

## 18. The device credentials will be displayed with all the details

IBM Watson IoT Platform

Device Drilldown - 199795

Device Credentials

You registered your device to the organization. Add these credentials to the device to connect it to the platform. After the device is connected, you can navigate to view connection and event details.

Organization ID	qe3ow0
Device Type	Nodemcu
Device ID	199795
Authentication Method	use-token-auth
Authentication Token	1997199520012005

Authentication tokens are non-recoverable. If you misplace this token, you will need to re-register the device to generate a new authentication token.

Find out how to add these credentials to your device

## 19. Save the details of the device as the authentication tokens are non-recoverable and if misplaced then we have to create a new one.

IBM Watson IoT Platform

Device Drilldown - 199795

Device Credentials

You registered your device to the organization. Add these credentials to the device to connect it to the platform. After the device is connected, you can navigate to view connection and event details.

Organization ID	qe3ow0
Device Type	Nodemcu
Device ID	199795
Authentication Method	use-token-auth
Authentication Token	1997199520012005

Authentication tokens are non-recoverable. If you misplace this token, you will need to re-register the device to generate a new authentication token.

Find out how to add these credentials to your device

ibmdet - Notepad

```
Organization ID qe3ow0
Device Type Nodemcu
Device ID 199795
Authentication Method use-token-auth
Authentication Token 1997199520012005
```

20. Clicking on the device tab we can now see the added device. Clicking on it will display the other details.

It has different tabs like Identity, Device Information, State and login.

The screenshot shows the IBM Watson IoT Platform dashboard. The top navigation bar includes 'Browse', 'Action', 'Device Types', and 'Interfaces'. A search bar labeled 'Search by Device ID' is present. A table lists devices with columns: Device ID, Status, Device Type, Class ID, Date Added, and Descriptive Location. One device is listed with ID 199795, Status 'Disconnected', and Device Type 'Nodemcu'. Below the table, a modal window is open for the selected device, showing tabs for 'Identity', 'Device Information', 'Recent Events', 'State', and 'Logs'. The 'Recent Events' tab is active, displaying a message: 'The recent events listed show the live stream of data that is coming and going from this device.' Below this message is a table with columns: Event, Value, Format, and Last Received. The bottom of the screen shows a Windows taskbar with the date and time 8:11 PM 9/17/2022.

This screenshot shows the same IBM Watson IoT Platform dashboard, but with the 'Device Information' tab selected in the modal window. The 'Device Information' tab displays the following details for the device with ID 199795:

Property	Value
Device ID	199795
Device Type	Nodemcu
Date Added	17 Sep 2022 20:07
Added By	worldisfullofmeow@gmail.com
Connection Status	Disconnected

At the bottom of the modal, it shows 'Items per page: 50' and '1 of 1 page'.

In a similar way, we can create n number of devices with a 50 per page limit as per the requirement of our project.

21. The Boards will display card for the project.

## RESULT:

An IBM Watson cloud for IoT and a device is created
